

ŁÓDŹ UNIVERSITY  
POLISH TRIBOLOGY SOCIETY

**TRIBOCHEMISTRY**

Proceedings of the Symposium  
6 - 8 September 1993, Łódź

## CONTENT

- Chwaja W. and Growcott P.:  
Improving the Lubricity Characteristics of Low Sulphur City Diesel Fuel.
- O' Connor S.P. and Hammer L.:  
Tribological Study of Overbase Detergents.
- Janecki H.P. and M. Janecka:  
Applying of Instrumental Analytical Methods in Tribological Investigations
- Furey M.J.:  
Tribochemistry of "in Situ" Polymer Formation on Rubbing Surfaces as an Antiwear Mechanism.
- Kajdas C.:  
Some Aspects of Boundary Lubrication Mechanism and Findings Relating to the NIRAM Application.
- Kempiński R.:  
Surface Analytical Techniques in Tribological Studies.
- Kirpichenko Y.E., Konchits V.V., Myshkin N.K.:  
Tribiochemistry of Lubricated Sliding Electrical Contacts.
- Kulczycki A.:  
The method of Synthetic Description of Complex Processes of Lubrication
- Marczak R., Maciag A. and Guzik J.:  
Application of ATR Infrared Spectroscopy to Detect Organic Compounds Included to External Layer of Operational Origin.
- Margielewski L., Strombek B., and Płaza S.:  
Wear Behaviour of Neutral, Basic Zinc Diisobutyl(dithiophosphates and Bis(O,O-diisobutoxyphosphinothioyl) disulphide in the Presence of Soot.
- Ozimina D.:  
The Effect of Electrochemical Properties Organometallic Compounds on the Frictional Process.
- Płaza S., Kajdas C. and Gruziński R.:  
Tribiochemical Reactions of Some Sulphur Organic Additives.

**Wachal A. and Kulczycki A.:**

**Derivatographic Investigations of Sulfur Additives Sorption on Metal Surfaces.**

**Wachal A.:**

**Microscopic Investigations of Freezing Process and Rheological Properties of Pure Hydrocarbons and Their Mixtures.**

**Watanabe S.:**

**Friction and Wear between Synchronizer Rings and Gear Cones.**
